

LAVA CABLE

LET YOUR SIGNAL FLOW

DEALER CATALOG **2009**

The Lava Solder-Free Pedal Board Kit

Featuring the smallest right angle and straight solder-free plugs on the market - the Lava Plug™ and the lowest capacitance patch cable available - Lava Mini ELC, the Lava Solder-Free Pedal Board Kit is a revolutionary do-it-yourself cable system that provides pure TONE and pedal spacing closer than ever before. Unlike any other similar product on the market, the cable and plug were designed together as a matched pair using a special grounding sleeve instead of set screw for the ground connection. This grounding sleeve design significantly increases reliability and provides for the best possible connection using solder-free plug technology. With only four easy steps for assembly, the Lava Solder-Free Pedal Board Kit is the ideal choice for any musician wanting reliability and uncompromising tone with virtually no signal loss. The Lava Solder-Free Pedal Board Kit is Made in the U.S.A.

The Lava Blue Demon Cable

This cable was designed for rugged stage use and provide superior performance at a bargain price, with better sonic characteristics and performance than all instrument cables in its class. It Features G&H Industries Ultra High Clarity Plug™ where the conductor is soldered directly to the tip, a 99.9% pure copper low strand count conductor, 23 pF/ft low capacitance, a 93% spiral shield for excellent RF rejection and it is assembled with 4% silver solder to maximize signal flow. Made in U.S.A.

The Lava Clear Connect™ Cable

The Lava Clear Connect™ cable is designed to be the very best guitar and instrument cable on the market at an affordable price. It features G&H Industries solder-free Pure Plug™ and Clear Connect Technology™ - a patented process where the connectors are high-pressure crimped onto the cable. As a result, the Lava Clear Connect™ Cable produces the purest signal path possible. At 26 pF per foot it's capacitance has been designed in at the sweet spot for instrument cables. With a large outer diameter of .260", 98% shielding, and 99.999% pure Oxygen Free Copper (OFC) for both the shield and conductor, it is a world-class cable capable of superb performance and durability in all situations. Made in U.S.A.

The Lava Retro Coil Cable

Featuring a 99.999% pure oxygen-free low strand count copper conductor and G&H Industries Ultra High Clarity Plug™, the Lava Retro Coil Cable delivers superior sonic performance for a coiled guitar cable. By using fewer strands, extremely pure copper and G&H Industries Ultra High Clarity Plug™, the Lava Retro Coil Cable overcomes much of the high capacitance tone-choking effect present in all coiled guitar cables due to the excessive copper used and their length. As a result, a smoother more balanced response is achieved, providing for a more open sound from guitar to amp. Made in the U.S.A.

The van den Hul Integration Hybrid Lava Cable

The van den Hul Integration Hybrid Lava Cable represents the pinnacle in guitar cable design and uses four stranded "Fusion Technology" conductors in a star quad configuration. Its gold colored jacket is made of HULLIFLEX®. This cable is specially made for Lava Cable by van den Hul, a company with more than thirty years experience making specialized high-end audio cable. One customer commented: "All the frequencies are well represented. Good string definition. Fantastic harmonic bloom. Makes notes sustain forever. It has got some weird kind of mojo going on. There is something very special about the vdH." The van den Hul Integration Hybrid Lava Cable is Made in the Netherlands and Terminated in the U.S.A.

The Lava CPS™ (Configurable Pedalboard System)

Introducing the Lava CPS™ (Configurable Pedal Board System) - the first ever completely configurable pedal board. The Lava CPS™ is built from super strong, specially formulated ABS to easily handle the rigors of stage use.

Each piece is secured to form-fitting ABS base plates and the adjoining piece at a minimum of 8 points and up to 14 points with machine screws along with locking nuts - making a rock solid pedalboard. You are now free to shape your pedal board at will and add new pedals without having to remove one you love because you are out of real estate. The revolutionary way to array your pedals - any way you want.

The Lava CPS™ requires assembly and tools and instructions are provided. In addition, each Lava CPS™ comes with enough Dual Lock™ Velcro to affix a pedal per each single piece. There are currently four different shaped ABS base plates for the Lava CPS™ allowing users shape their overall board however they want with the flexibility to still add pieces and grow without having to purchase a whole new board. Each individual Lava CPS™ piece has steel threaded inserts in all four corners enabling a secure, repeatable connection to any ABS base plate. Made in U.S.A.

The Lava Flow by PSIONIC AUDIO

The Lava Flow by PSIONIC AUDIO is the most comprehensive and versatile A/B/Y selector available on the market today. Housed in a rugged 18 gauge powder coated steel enclosure it features three isolated send and returns, a foot switch out, a high quality non-invasive input buffer to prevent signal loss for long cable runs, and a special isolation transformer prevent ground loops. The Lava Flow significantly reduces pedal board tap dancing and makes it easier for guitarists to quickly get the effects they need while using two-amp or one-amp setups. The Lava Flow is made in the U.S.A.

LET YOUR SIGNAL FLOW

Lava Cable is the world's premier custom shop for high-end instrument cable assemblies for the music industry and currently enjoys the best reputation on the Internet as the source for all things guitar cable. Having closely examined and built cables from about 80% of the world's instrument cable manufacturers, Lava Cable has designed a world-class line of high performance guitar cables as well as an innovative configurable pedal board for musicians. Using proven cable design theory and tightly controlled manufacturing processes these cables deliver superior sonic performance and durability to meet the increasingly challenging demands of musicians. All Lava Cables are made and terminated in the U.S.A with the exception of the van den Hul Integration Lava which is terminated in the U.S.A. Lava Cable uses an on-demand manufacturing process where each dealer order is made fresh and shipped direct typically in 5-10 days. All Lava Cable products come with a lifetime warranty and customer service second to none.

Lava Cable recently partnered with G&H Industries to design a new revolutionary DIY solder-free, low profile plug – The Lava Plug™ that was designed to tightly match Lava Cable's new Mini ELC™ cable for pedal boards and instrument use. Lava Cable and G&H Industries also offer the Lava ELC Clear Connect cable which features G&H Industries patented Clear Connect Technology and Pure Plug™ . These revolutionary new cable and plug combinations have been engineered to be superior to any like product on the market.

Lava Cable is a veteran-owned company that was started just prior to the owner's deployment to Afghanistan in May 2004. Lava Cable to date has sold more than 30,000 custom cables in the U.S. and in more than 45 countries around the world. Articles on Lava Cable have been featured in Vintage Guitar, Premier Guitar and Music Trades magazines. The Lava Cable dealer base is growing with more than 40 dealers around the world as of December 2008. We invite you to see how Lava Cable products can add to the profitability of your store.

Artists using Lava Cable Made Products - Greg Howe, Steve Morse, Tomo Fujita, Steve Kimock, Mark Karan (Ratdog), Rogers Stevens (Blind Melon), Alex Weeden (Miranda Lambert), Shawn Tubbs (Carrie Underwood), Scott Patton (Sugarland), Dave Ristrim (Big and Rich), Josh Smith (Taylor Hicks), Greg Jennings (Restless heart), Kim Wilson (Fabulous Thunderbirds), Gordie Sampson, Greg V., and many others...
